1. INTRODUCTION

BE A GREAT NAVIGATOR

We know mobile navigation and it is just a matter of time before you know it as well.

Once you have read the Wisepilot User guide and learned how to use the features we offer, your everyday life will feel much more free, safe and organized since all the information you need is provided through your mobile phone.

So, please take the time to go through the guide and learn all about Wisepilot mobile navigation.

Best regards,
The Wisepilot Team

2. GENERAL APPLICATION STRUCTURE AND FUNCTIONALITY

2.1 USER INTERFACE

The select icon

The **Select icon** placed above the fire button on the phone, indicates that the fire button can be used for selecting/opening the marked object. It may be a drop down box, a menu item, a folder, a button or a map position.

Action Menu icon

Items that have Actions/functions are indicated with the **Action menu icon** placed above the fire button on the phone.

The Action menu contains all actions that can be used on the marked object (a map position, a favourite or a list element).

To reduce the cognitive load of the driver, all context sensitive and navigation related features are placed in the Action menu in the navigation view. The navigation view action menu is also triggered by tapping the navigation view on touch screen devices.

Options menu

The Options menu, on most phones accessed from the left phone button, contains access to general options and frame related options. It contains both static options (below the horizontal line) and context sensitive options above the horizontal line (like sorting options for lists).

Option menu elements:

- **Tools** (You can access **Tools** from anywhere within the application by pressing * on the keypad.)
 - **Make phone call** (opens the phone's own call application)
 - **Show route demo** (only in the navigation view and only when there is no GPS connected/bad quality GPS signal)
 - **GPS on/off** (only for phones with built in GPS receivers)
 - **Start/End trip report**
 - **Pause/resume trip report** (if there is an ongoing trip report recording)
 - **View trip report** (if there is an ongoing trip report recording)
 - **Save as favourite:** This service make it easy to save your current GPS position or latest valid position in your list of favourites and add information. Select **Options > Tools** and select **Save as favourite**. Add the information you want and select **Save**.
 - **Report map error:** If you detect errors in the maps you can report them directly with the map error report tool. Open **Options > Tools** and select **Report map error**. You will then receive an email to the email address you have registered on your Wisepilot account. The email contains a link to a web form where you can fill in the details and additional information that is required to correct the potential map error. Your error reports are sent directly to the map provider and you will get a confirmation email and a solution status update when it has been changed.

- **Help**
 - **About Wisepilot**
 - **Online help**
 - **My web portal**
- **Settings (same as Settings in Main menu)**
- **Exit**

2.2 BASIC APPLICATION FLOW

Find a position or a destination. If your search was not explicit, all results are presented in a list. To sort the list, select **Options > Sort by distance** or **Options > Sort by name**.

By selecting the button **Show map** in the list header, you can view all search results in the list on a map.

If you select an item in the list an Action menu with the possible actions on the selected object appears:

- **Details**

This options displays all information related to the destination, such as address, distance, phone number

- **Drive here/Drive via** (Drive via only when a non pedestrian route is ongoing)

This option will calculate a vehicle based route to the selected destination and start a navigation session according to your settings in **Settings > Navigation**.

When there is an ongoing route, the element will change label to **Drive via** and the destination will be placed as an intermediate route stop as clever as possible in between the current location and the destination.

- **Walk here/Walk via** (Walk via only when a pedestrian route is ongoing)

This option will calculate a pedestrian route to the selected destination and start a navigation session according to your settings in **Settings > Navigation**.

When there is an ongoing route, the element will change label to **Walk via** and the destination will be placed as an intermediate route stop as clever as possible inbetween the current location and the destination.

- **Show map**

View the destination on a map.

- **Find nearby**

Find interesting things like restaurants, gas stations, museums etc. nearby the selected destination.

- **Weather**

Get a weather forecast for the selected destination.

- **Start from here** (Only when no GPS position is available)

Set the selected destination as current position/start position.

- **Call** (Only if there is a phone number available for the destination)

Initiates a call to the selected destination.

- **Save/Edit** (Save if it is a new search, edit if it is an existing favourite)

Save the selected destination to your list of favourites or edit the selected favourite.

- **Delete** (If it is an existing favourite)

Delete the selected favourite from the favourite list.

- **Share this**

Share the selected destination with friends and colleagues by sending it as an SMS. You can enter a number directly or find a contact from your contact book. The recipient will receive it as an SMS and the destination will be stored automatically in **Favourites** if the receiver is a Wisepilot user.

- **Open web page** (If there is a web page connected to the destination)

Opens the destination related URL in the phones web/wap browser.

3. MAIN MENU FRAME

3.1 FIND

Near me

Select a category and what you want to find nearby your current position, for example Eating & drinking, Travel & transport and Shopping. If you know what you are looking for you can enter the name of what you want to find¹.

Person, Business²

Wisepilot supports integration of directory listings (Yellow and White pages). This means that you can search for people and companies directly in Wisepilot and use the results as destinations. Enter name, address or phone number of a company or private person³.

Address

Select country and enter either city or postal code⁴. You can refine your search by also enter a street name and number (optional).

- For cities that have named city parts you can try to enter the name of a specific city part.
- If you enter a postal code you have to enter a street name as well, otherwise Wisepilot cannot find the address^{5, 6}.

Intersection

Select country and enter either city or postal code⁷. You can choose to input **Street name** to get a list of all intersections related to that street, or simply choose to input also the **Cross street name** to search for a specific intersection.

Position

Enter longitude and latitude in the input fields, for example:

E 6 16.794

N 49 07.59

When the search is completed, Wisepilot automatically tries to get the address of the found position.

3.2 FAVOURITES

Wisepilot allows you to save any type of destination as a personal favourite. After you have found an address or destination, select **Save** from the action menu to add it to the list of Favourites.

Wisepilot automatically stores your last searches in the folder **Search history** in **Favourites**.

1 In most cases it is sufficient to only enter a part of the name or address. E.g. Oxford St.

2 Not available in all countries

3 In most cases it is sufficient to only enter a part of the name or address. E.g. Oxford St.

4 The Country drop down box contains a list of all countries covered in your subscription. At startup, the City drop down box contains the largest cities in the selected country. When you search for other cities by entering that in the City field, the predefined cities are overwritten one at a time and over time turns into a city search history memory

5 In most cases it is sufficient to only enter a part of the name or address. E.g. Oxford St.

6 In Great Britain and the Netherlands you can search on postal code only

You can organize your favourites in folders. Select the favourite you want to move to a folder. Then select **Edit** from the Action Menu. You can select to move the favourite to an existing folder or create a new. In **Edit** you can also add information about your favourite. To delete a favourite, select **Delete** from the Action Menu.

If you want to delete or rename a folder, open the Options menu to find these options.

3.3 SHOW MAP

The map view

In map view you can find your current position by selecting **Where am I?** in the Option Menu.

You can activate/deactivate the **Map follow** mode (shortcut 6), which means that the map is always centered around your position (even when you move around/drive your car).

The marker is displayed when scrolling in the map or when clicking the fire button. Once the marker is displayed, you can access the Action menu and thus all the available actions for the marked map position.

The action menu header will automatically change into displaying the address of the marked position (this may take a few seconds). If it is not possible to get any address, the header will remain as “Map position”.

-  Cursor
-  Your current position
-  Your current position if you have an ongoing route
-  Your current position if you have an ongoing pedestrian route
-  Your favourites
-  Your destination'
-  Your intermediate stops

  To zoom in press button 3, to zoom out press button 1

3.4 MORE

Weather

There are two ways to get a weather forecast:

- Select **More > Weather** from the Main menu. Select a destination from the list and select **Weather** to get a 24 hour and 5 day forecast.
- The **Weather** option is always available in the Action menu when you have selected an address, favourite, person, company or a position in the map. This way you can get weather forecasts for any place you find in Wisepilot.

Start trip report

There are three ways of starting a trip report:

- To manually start a trip select **More > Trip report > Start** from the Main menu.
- You can also start a trip report manually from anywhere in the application by selecting **Options > Tools > Start trip report**.
- If **Automatic trip report** in **Options > Settings > Navigation** is turned on, a trip report is automatically started when you select **Drive here/Walk here**.

To end the trip report recording, select **End** either from **Main menu > More > Trip Report** or from **Options > Tools > End trip report**. If **Automatic trip report** in **Options > Settings > Navigation** is turned on the trip report is automatically ended when you reach your destination

To save your trip report, select **Save** when the trip report is ended. The trip report will be saved to your account on www.wisepilot.com. On the web you can then manage your saved trip reports and export them to Excel or pdf-files.

The trip report can be paused, resumed, viewed and ended from **Options > Tools**.

3.5 SETTINGS

General settings

General settings.

Speed alerts settings

Settings regarding speed camera alerts.

Navigation settings

Settings regarding what is shown in the navigation view and other settings regarding navigation.

Map settings

Settings regarding what is shown on the map, for example when selecting **Show map** or **Route on map** from navigation view.

GPS settings

Here you connect an external GPS receiver and view the GPS reception quality.

4. NAVIGATION

1) Your start position:

If you have GPS position this will be your start position automatically. If no GPS position is available, your last GPS position will be used, or you can set your start position manually.

2) Select Destination:

Select where you want to go. (Find nearby/ address / person / company / intersection / position, select favourite or select position on map.)

3) Start a route:

You can select between pedestrian mode or vehicle mode (**Drive here** or **Walk here**)

When the GPS position has too low quality to be able to clearly define the start point, Wisepilot will inform you about this and ask if you want to calculate a route based on the last known position as start point. If you want, you can choose to wait until the GPS position is good enough and Wisepilot will then automatically calculate the route.

4.1 NAVIGATION VIEW

Action menu elements in navigation view:

- **Find** (shortcut 1)
- **List traffic** (always present, but not active when there is no traffic info (shortcut 2)
- **Reroute** (shortcut 3)
- **Route on map** (shortcut 4)
- **Route as text** (shortcut 5)
- **Show itinerary** (shortcut 6)
- **Night / Day colours** (shortcut 7)
- **Zoom in/out** (shortcut 8)
- **More options** (shortcut 9)
 - **List POIs** (shortcut 9, 1)
 - **Pause navigation** (shortcut 9, 2)

4.2 ITINERARY

View the current itinerary

When you select **Show itinerary** in the navigation view Action menu, the currently valid itinerary is displayed.

The remaining intermediate stops are marked with an orange flag and the final destination is marked with a black and white.

The items can be moved and deleted from the Action menu. When the itinerary has been changed in some way, the button **Reroute** will appear at the bottom of the display. A reroute is needed in order to update the route according to your modifications.

Add intermediate stops to your route

There are different ways of adding stops to your ongoing route:

- From the navigation view.

Open the Actions menu and select **Find**. Type the desired new location and when you have found the new location, open the Action Menu. Select **Drive/Walk via** to add it as an intermediate route stop. The stop is added as clever as possible, but the final destination is always kept.
- From the map view

Open the Actions menu in navigation view and select **Route on map**. Click on a map position and open the Action Menu. Select **Drive/Walk via** to add it as an intermediate route stop. The stop is added as clever as possible, but the final destination is always kept.

- From within the existing itinerary view

Open the navigation view Action menu and select **Show itinerary**. In the itinerary frame, open the Options menu and select **Find** and find the desired type of location. Open the Action menu and select **Drive/Walk via**, and the location is added as a presumable intermediate stop item in your itinerary (the orange flag associated to the added stop is marked with a green + sign). The items can now be rearranged or deleted in the itinerary. When the itinerary frame has been changed, the changes must be activated by re-calculating the route by clicking the button **Reroute**.

4.3 TRAFFIC INFORMATION¹

Wisepilot will alert you when a traffic event is affecting your ongoing navigation. The traffic information is continuously updated. For this option to be activated, the checkbox **Traffic info along route** in **Settings > Navigation** has to be marked.

4.4 SPEED CAMERA WARNING

When **Speed camera warnings** in **Settings > Speed Alerts** is enabled, Wisepilot will automatically alert you when you are driving too fast and there is a speed camera ahead, even if you do not have an ongoing route.

Note: Speed camera warning only works if speed camera coverage is available in the current country and if you have GPS and GPRS coverage.

4.5 ZOOM

Wisepilot has a built-in speed sensitive zoom. When you drive at higher speed the map zooms out allowing you to see more of the route ahead of you. When your speed is reduced the map will automatically zoom in.

In addition to the automatic zoom it can be controlled manually. Open the Action menu and select **Zoom in/out** to change zoom level (shortcut 8).

5. HANDLE MY SUBSCRIPTION

5.1 EXTEND

From **Options** in the main menu you can select **My subscription**. Here you can get information about how to extend your subscription.

5.2 MY CURRENT SUBSCRIPTION/ LOGIN/ ID

From **Options** in the main menu you can select **My subscription**. Here you can get information about your current subscription, your ID and your login on the web.

¹ Not available in all countries

6. WISEPILOT ON THE WEB: WWW.WISEPILOT.COM

You find your login information in Wisepilot on the phone under **Main menu > Options > My subscription**.

6.1 SEARCH DESTINATION

As in Wisepilot on the phone you can select between a number of search types: **Search addresses, search for people, search companies** and **search coordinates**. You can also click directly in the map to get an address and position.

6.2 MANAGE YOUR FAVOURITES

On the web you can manage your favourites in an easy way.

- Add a favourite by finding a destination and then select to **Save favourite** from the menu.
- Under the Favourite tab you can select to **Delete** and **Edit information** about a favourite (move to another folder or add/change phone number, internet address or information)

Each time you start Wisepilot on your phone your favourites on the web and on the phone will be synchronized.

Menu: When you click on a destination in the result list a menu is presented.

6.3 CALCULATE A ROUTE

To calculate a route you first have to define your start point. Search for an address or coordinates under the tab Search or select one under your Favourites. When you have found the desired start point select **Use as start** in the menu (see picture above). Then find your destination in the same way and select to **Route here** in the menu.

6.4 THE MAP

To pan the map, hold the left mouse button down and move the mouse in that direction you want the map to move.

6.5 TRAFFIC INFORMATION¹

Here you can view current traffic information about a specific area. You can add your own areas by moving the map to the area you would like to save, type in a name and click **Save**.

¹ Not available in all countries

6.6 MANAGE YOUR TRIP REPORTS

Here you find your saved trip reports. You can select **Add to travel report**, or to **Delete** the trip. Once you have added your trips to a Travel report, you can select to export them to Excel or pdf-files.

6.7 SUPPORT

Under the Support tab you will find useful information.

- Getting started will give you help with preparing your phone, installation, activation and how to connect a GPS. If you run into problem and cannot find your answer in the FAQ, you will find contact information under Contact support.
- Information on usage. Here you will find the user manual, frequently asked questions (FAQ) and tips about how to use Wisepilot.

6.8 SUBSCRIPTION

To view information about your subscription, license key and to Extend your subscription, select the Subscription tab.

6.9 EDIT YOUR PROFILE

My profile is where you can edit personal information.
